## CashPlus CarePlan (CPCP) Patient Information and Patient Agreement

CashPlus CarePlan is a program designed to make health care more affordable for uninsured patients. This program is the solution for cutting health care costs if you do not have health insurance, if you seek services or providers not covered by your insurance, or if you have an HSA account (Health Savings Account) or other motor vehicle insurance and want to lower out-of-pocket medical costs. Cash Plus Care Plan also gives you control over your own healthcare decisions.

Thank you for joining CashPlus CarePlan. In our efforts to keep healthcare affordable, we also strive to keep annual cost of membership as low as possible. Membership for CashPlus CarePlan is just \$35 per individual or \$50 per family.

By offering CashPlus CarePlan services at reduced cost, please understand that you agree to the following regarding payment for services rendered:

- 1. Services are paid IN FULL at the time of service by cash, check or charge card before leaving the clinic.**
2. There is no billing of any insurance company, third-party or patient.
3. No medical procedure or diagnostic codes will be used to describe your service.
4. Additional services may be added to your office visit such as laboratory testing, x-rays, medication injections, etc. These service fees will be added to your office visit fee and will comprise your final billing total. CarePlus has an agreement with an outside laboratory for any lab tests that may be needed to achieve maximum results for your particular medical condition. Your lab fees will be included in your final billing here at CarePlus, and CarePlus will pay the outside lab for tests ordered on your behalf. Feel free to ask CarePlus staff about additional fees so that you are clear about the additional fees you will be expected to pay.
5. Financial costs in health care are a real concern for all of us and we understand the reality of limited financial resources. Please discuss with your CarePlus Practitioner any additional testing they feel is important to achieve maximum results for your particular medical condition. Additional testing should be your choice and you should always be in control of deciding if you want your provider to order the tests he/she recommends for you.
6. CarePlus cannot control the charges of outside agencies, specialty practitioners or specialty care that our practitioners may feel is necessary to achieve maximum results for your medical condition. If our CarePlus practitioners refer you outside CarePlus for further testing or consultation with a specialist, the testing facility or specialist you are referred to will bill you separately for their services.

I have read and agree to the above terms.

Signed: \_\_\_\_\_ Date: \_\_\_\_\_

**Please give this agreement back to your provider's office for their files**
